## DETAILED ACTION

1. Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakamoto (U.S. Patent # 6,674,270) in combination with Zadeh et al. (U.S. Patent # 6,522,111).

Sakamoto discloses claimed invention a voltage regulator circuit (figure 1), including a high voltage regulator (figure 1, item 1), a plurality of parallel voltage regulators (figure 1, item A1, A2 A3). However Sakamoto does not disclose the utilization of the technique for low dropout regulator. Zadeh et al. teaches the utilization of the similar technique for low dropout regulator (Abstract line 1-10). It would have been obvious one having an ordinary skill in the art at the time the invention was made to modify Sakamoto's power cut device by utilizing the technique taught by Zadeh et al. for the purpose of improving efficiency of the power supply.

Art Unit: 2838

***Allowable Subject Matter***

3. Claims 9-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
